<b>Title:</b>	<b>Priority:</b>	<b>Estimate:</b>
<b>User story</b>  Pawan Kalyan, who is about to graduate and in a confusion state to choose project. As a about to graduate I need to do a project which is related my technical subjects, but I'm in state where to start what to start how projects already established on my idea which I have now.		
<b>Acceptance criteria</b>  I'm on our <b>web page</b> as a graduate student seeking for a topic in my field. I'd want to conduct a search using the main search box (for my interest on tech) so that I may browse results with metadata and filter or sort them. As a graduate student, I want to be able to click into an item after I receive the findings so that I may learn more about it. As a graduate student, I'd like to have a permanent link that I can refer to in the future. As a graduate student, I'd like to be able to access a PDF of a recent dissertation on the item, as well as download or view it in my browser.

<b>User story</b>  Minny, who is completed graduate and want to showcase his project to the external world. As a completed graduate my next step is to start a job search and to that I need to show case my talent and project what I have accomplished is important to that I need a platform.		
<b>Acceptance criteria</b>  As a completed graduate I need a platform where I can show my talent and area interest and then explore my chances to get job and start a new career. For this I need a platform where I can upload my project and interact with the new people who are on the same field, and we can change our opinions on the same point.

<b>User story</b> Pranay, being as an administrator I need to look after every step of our application.		
<b>Acceptance criteria</b> Being an administrator, I need to look after the application with all aspect of maintain security and network firewall everything. When I login from my end it should be easy to track down the network issues and content what to be posted what not to be posted before the review.

<b>Title:</b>	<b>Priority:</b>	<b>Estimate:</b>
<b>User story</b>  Professor, as a professor i always seek students' interest on evolving technology.		
<b>Acceptance criteria</b>  when I login to the application the interface should be interesting, and I felt I had that with this application more over the way it is separated the departments also the bookmark option whenever I had a time I will continue to read where I stop. The main reason is the idea of projects, and the way students accomplish the aim of the project.
